Click To Download

PC Users:

The template files are .exe files. Once you have downloaded the template of your choice, simply double-click on it and the archive will open Win Zip and the file will self-extract.

**VERY IMPORTANT:** our templates are saved back to the oldest version we support. However, please be sure that you are saving your documents in the version you're actually using (for example, if you are working in Illustrator 10 do NOT

save back to Illustrator 8 just because that is how the template is saved)!

If your graphic designer has any technical questions, she or he is welcome to email us here .
